

If recycling, the following types of recyclables should be rinsed out & placed inside the bin:

1. Aluminum and tin cans
 2. Glass bottles (green, amber, and clear)
 3. Plastic milk and soda bottles (#1 and #2 only)
 - Look for a number on the bottom of the bottle, perhaps surrounded by a “recycle” symbol, to determine if the plastic is recyclable
 4. Colored HDPE (detergent bottles, bleach bottles, etc.)
 5. Please remove the caps from all plastic and HDPE bottles
-

If recycling paper, the following types should be placed in a plastic or paper grocery bag next to your bin:

1. Mixed office paper
 2. Junk mail
 3. Newspaper
 4. Chipboard (like cereal boxes, etc.)
 5. Magazines and catalogs
 - Corrugated cardboard is also recyclable but should be broken down and tied together so as to not fly away.
-

The following types of material are NOT recyclable:

1. Food contaminated packaging, such as pizza boxes or food wrappers
2. Containers that previously contained oils, such as cooking or motor oil
3. Styrofoam products
4. Disposable diapers
5. Plastic grocery bags, UNLESS they are used to hold recyclable paper
