

CITY OF CARLYLE BID DOCUMENTS

FOR

CITY WIDE WASTE COLLECTION

This document has been developed to encourage more recycling and discourage material being disposed of at landfills. This will reduce the dependence on raw materials. It will also extend the life of landfills which will help keep tipping cost competitive. Increased recycling will help keep customer bills lower because taking materials to a recycling center is less expensive than disposing of it in a landfill. Cities that have adopted such policies experience much higher rates of recycling. Since 2000, the trend has been to move to once per week solid waste collection. This change has been largely accepted in many municipalities in the area. It works especially well when customers lessen the amount of trash by placing recyclables in a separate container. A side benefit is the reduction of trash truck traffic in residential areas each week. The City of Carlyle wishes to provide its citizen's a no additional cost curbside recycling program by making the recycling service part of the base solid waste service plan. Bidders will be able to reduce their tipping fees at landfills and distribute any costs of the recycling program throughout all service customers in the City as part of the base solid waste service plan.
